A State's definition should be as a populated 'Piece of Land' or 'Group of Islands' with similar geographical conditions, wherein its spread should be limited to such distances, which can be travelled across its opposite borders 'Manually' or 'with help of Live stocks' or 'through Boats powered by Men', without use of any Machinery, within a period of Seven days. Two-way journey across opposite borders of a State should not require more than a Fortnight. A marginal approximation should be done to mark Boundaries/ Borders of a State, in such a way that naturally available milestones, such as- Rivers or Mountains are kept as definitive Borders. State's definition should include a clause, wherein it should share border with 'at least Two other states', in the case where 'it is a land locked State' or with 'Ocean', in the case 'it is a coastal State or an Island'. Small parcel of 'Land of different geography', such that 'it can be travelled within Three days' & is surrounded by 'a State' should not be considered as separate State. A state in itself should be a place, which can sustain its population through available Vegetations & Natural resources or through Agriculture and Animal husbandry. An 'Uninhabited Parcel of Land' or a 'Land populated by Researchers' or 'a Land occupied only for drawing Natural resources', wherein food & supplies for livelihood are outsourced cannot be 'a State or Part of any other State'. Any Human activity other than Research, should be completely prohibited in such 'No Man's Lands'. A State in itself should be a Complete entity, it should be considered as a Country or a Nation. Creation of larger Nations by joining Two or more States is always the root cause of uneven distribution of 'Revenues' or 'Political powers'. 'Political access' or 'Access to justice' for a common man remains a nightmare in larger states, due to layers of red tape.

Distance of Administrative centres (districts) within a State should be kept in such a way that two-way journey to 'an Administrative centre' can be completed within One day by 'Manually' or 'with help of Live stocks' or 'through Boats powered by Men', without use of any Machinery.

Members of Council of Saints, Ruler, Ministers, Administrators, Judges, Teachers & Astrologers of a State should be pillars of State's functioning mechanism. Hence, they should always be appointed out of those born & brought up in the concerned State.

Selection or appointment for any occupation from A Saint to Ruler to an ordinary labourer should be done on the basis of evaluation of His/ Her 'Horoscope verified by His/ Her behavioural & Physical traits' & 'Expertise gained from Ancestral occupation'. 'Expertise gained from Ancestral occupation' should not be a criterion in selection of Saints, Ruler, Ministers, Administrators, Judges, Teachers & Researchers. Teachers should be given broader role in assessing their Pupil's traits. Verification of traits assessed by Teachers should be done through Examination of incumbents. Every single mismatch in data obtained from Horoscope, Teacher's assessment & Examinations must be tracked & appropriate judgement in this regard should be made by the Judiciary. The data & mechanism for selection of Study & Occupation of Persons should be transparent & accessible to all. Those found guilty for misuse of power, in conducting this kind of exercise should be given most severe Punishments.

Use of Machinery based or Motorised means of transportation should be out of reach for everybody, excluding Members of council of Saints, Rulers & Researchers.

State, itself should refrain from indulging in any kind of Businesses. State's role with respect to Business should be limited to regulation & collection of Taxes. Role of 'Business people or Business organisations' must be restricted to their respective occupation. State must provide sufficient security to 'Business people or Business organisations' & at the same time 'Business people or Business organisations' should not be allowed to possess Arms or Armies, directly or indirectly. Pricing of Agricultural or Dairy products should be kept to such levels that those involved in Agriculture or Animal husbandry are able to sustain livelihood of their families through incomes generated from such occupations. Remunerations to Labourers should be kept to such levels that they are able to sustain livelihood of their families through incomes generated from such occupations. Distribution of freebies by States in any form should be avoided, except in the situations of Calamities or Draughts. Even such relief should

be in a transparent manner & should be limited to 'actual utility of such relief' & 'period of such Situation'. Accounts of Governments should be transparent & accessible to all.

Cross boarder 'Business people or Business organisations' should not be allowed to interfere in the matters of State's affairs or State's religious/ Cultural affairs. Cross boarder Trade in a State should be driven by State's actual necessities. Any Product/ Service of international trade should be restricted or at least controlled through Duties or Taxes, if it impacts local Economy, even if the import is cost effective.

State wise council of Saints should be created. Approval from this council should be taken for Enactment or revision of Laws, specifically those related to;

1. Human behaviour with other Human beings
2. Human behaviour with Animals
3. Human behaviour with Trees
4. Nationals Laws, Strategies & Policies, along with Strategic decisions & decisions beyond Policies of the State.

Supervision of 'Implementation of these Laws' should be under the council of Saints. The Council should be empowered to take punitive action against Ruler, Ministers, Administrators or Judges, not adhering to the norms set by the Council. Such actions should be limited to specific person or persons. Permission for En mass action against the whole system should not be given to the Council.

A 'Permanent Worldwide Council of Saints' should be created. Every State should be given equal participation in this Council. Foreign relations of all the States should be under observation of this Council. Selection of members of 'Worldwide council of Saints' should be done by their respective 'State wise council of Saints'. Every State should contribute 1% of its nett annual revenue to this Council of Saints. In case, any State want to create its 'Arms & Army', such State should contribute, by providing & maintaining equal amount of 'Arms & Army' under the control of 'Worldwide Council of Saints'. 'Worldwide Council of Saints' should take action against those States or group of States, trying to alter borders/ Boundaries of any State. States should provide sufficient place within their territories for Local & Worldwide councils of Saints. The Land provided so, should not be more than 1% of total area of respective State's territory. The Worldwide Council of Saints must provide relief, from their reserves, to People of those State's facing any Calamities or Draughts. All the Councils of Saints should have transparent accounting system, accessible to all.

Those Saints 'wish to' or 'have become part' of any 'Council of Saints' should be unmarried & they should not have/ had marital relations in any form. Any hereditary appointment of relatives of members of such Councils should be avoided. Representatives of 'Local State wise Council of Saints' must have another layer for observation of performance of 'Worldwide & Local Councils of Saints' & their members. Any Member of Councils, found to perform in a manner other than larger interest of Society as a whole, should be removed & punished. This exercise is necessary to have check on fake Saints.

If any person raise complaint against a Saint or Ruler or Minister or Administrator or Judge or Teacher or Researcher or Astrologer, for misuse of power in any manner, he must be heard with highest priority. Full immunity to the complaining person should be given. Fast track enquiry should be done in such case & higher level of Punishment, when compared to ordinary Citizens, must be given to the Guilty.

A branch of Secret services under direct observation of Ruler of a State should be created for observing actions of Saints, Ministers, Administrators, Judges, Teachers, Researchers & Astrologers of the State & appropriate mechanism for taking necessary action against those found guilty must be designed. Punishment should be given to those found guilty. Trial & Judgment part for such cases should be transparent & under joint body of Judiciary & State's Council of Saints.

Local laws should be formed in such a way that Harmony between various segments of the Society of a State is maintained. Anybody involved in creation of disturbances in society either by use of Media or Man power or Funds should be Punished.

Even in any kind of Emergency the structure of Government should not change. Neither the Ruler nor Council of Saints nor Judiciary nor Administration should be allowed to overtake the System. The Worldwide Council of Saints should draft their regulations, in such a way that they themselves cannot at 'any time' or 'in any situation' overrule sovereignty of a State.

Inward migration of People of other states should be recorded. Inward migration should be permitted only to the extent to fulfil needs of the host State. As an exception, a temporary refugee inflow may be accepted, in order to help the people, in case of any calamity in their source state. But such emergency exceptions should be reversed by sending such refugees back to their original State, post end of such Calamity. Citizenship to inward migrants should be given, not before Five years of their stay. It should be ensured that inwardly Migrating people have respectfully accepted local culture & ethics, before they are awarded citizenship of the host State.
